

BUSTER

Dear Partner,

We are currently developing “Buster” animated series, with the prospect of creating a feature-length movie, a line of merchandising, a franchise.

Entertainment gag series about Buster and his Friends is a series of comic episodes from the protagonist’s life, his interaction with the underwater and “above-water” worlds and their inhabitants.

We have some [test videos](#) illustrating this idea.

We envision making 6 pilot episodes.

The production cost of one episode starts from \$ 155 000, with the timeline of 3 months or so. The estimated production budget of 100 episodes is \$ 9 million.

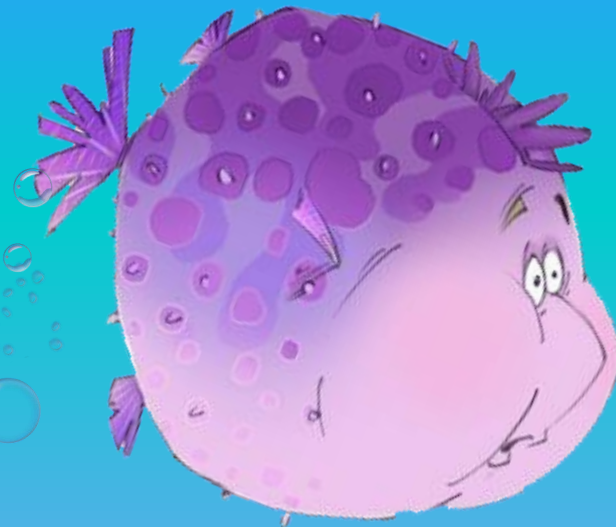

We invite you to become our Partner and create the project that conveys kind traditional values and has a huge potential for the wide audience.

GALAXY VISION – a top-of-the-range company in the sphere of innovative visual technologies – will be happy to cooperate with you!

We kindly ask you to consider our proposal. If you are interested, we will be eager to discuss the terms and conditions of cooperation and provide you with the detailed information on the project upon your request.

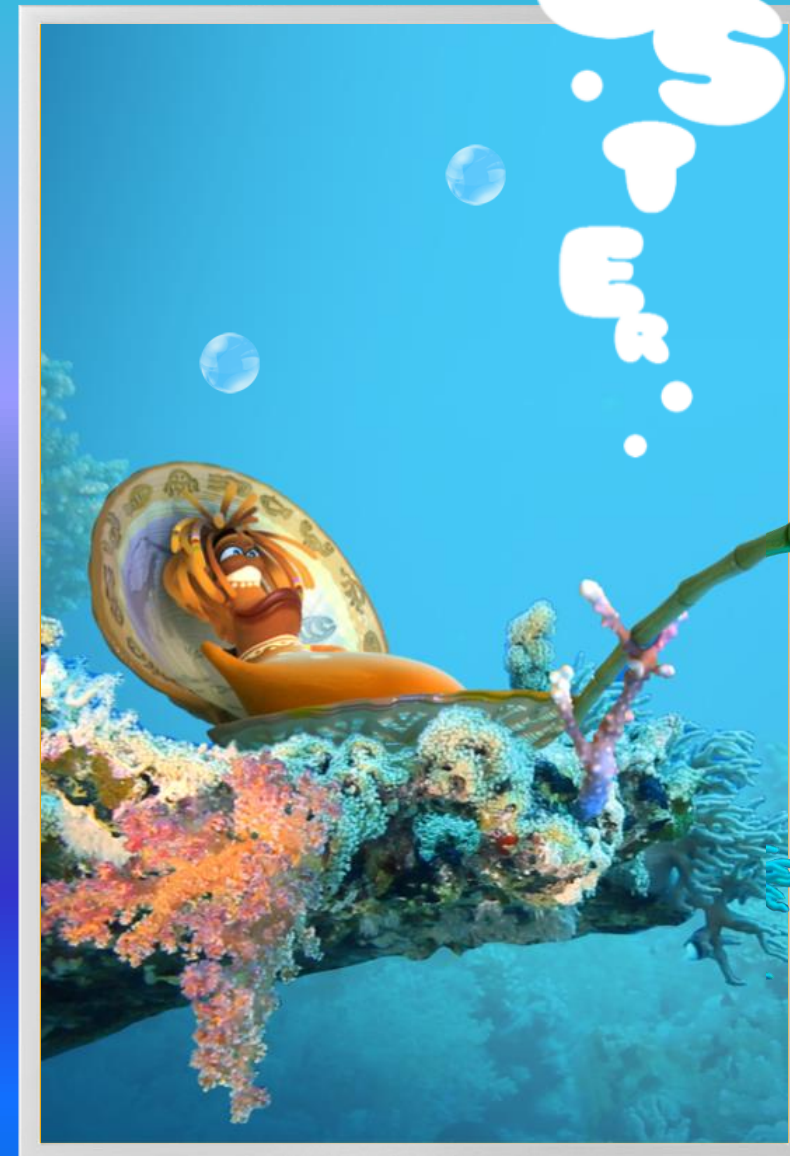

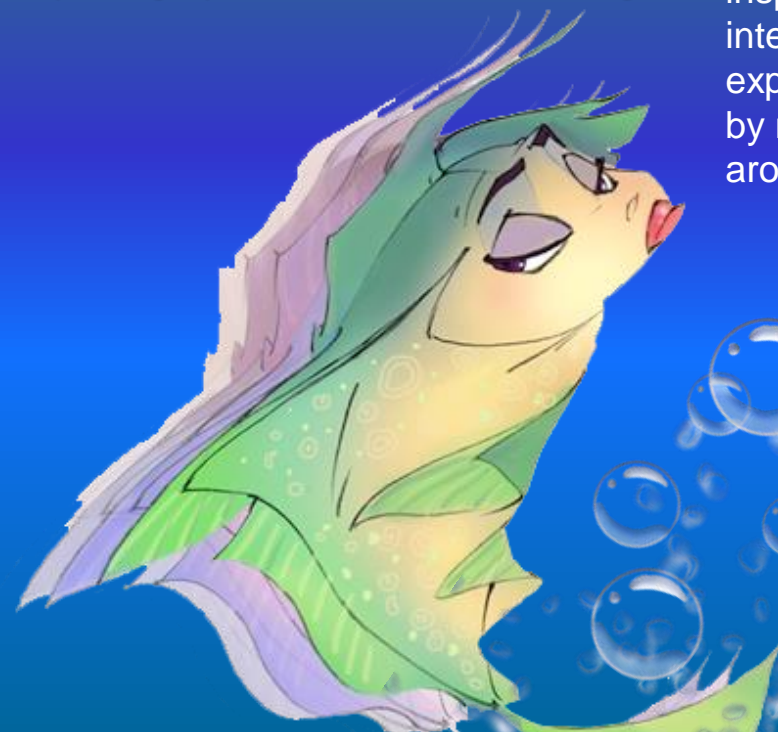

***Best regards,
Anatoly Sverchkov
GALAXY VISION***

GALAXY VISION converts animation, documentaries and feature films into 3D format for theaters. We also produce content for auto stereoscopic screens without glasses as well as anaglyph format. We are able to convert both new footage and existing feature films and animation.

Today, GALAXY VISION is an international company with presence in New York City, Los Angeles, Beijing, and Koh Samui (Thailand). We draw inspiration from our full-fledged international network and seek to expand our knowledge and experience by meeting top professionals from around the world.
